

ABSTRACT OF THE DISCLOSURE

A foot treating apparatus comprising a basin that is adapted for accepting and containing bathing water and is shaped and arranged to accommodate two human feet within the bathing water. A steam generator is included and adapted to accept and contain steamable water, to convert the steamable water into steam, and to direct the steam through a steam vent disposed above the bathing water and at one or both of the soles of those feet when the feet are removed from the bathing water. Dry massage means, heating means, vibration, and aeration are also provided.
